

Chloe Lam

chloelam2407@gmail.com | chloelam.ca | linkedin.com/in/chloe-lam-2407 | github.com/chloe2407
Toronto, ON & Vancouver, BC

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, Dart

Frontend: React.js, Next.js, HTML, CSS, Material UI, Flutter

Backend: Node.js, FastAPI, REST APIs, MongoDB, Firebase

Tools: Docker, AWS, Google Cloud Run, Vercel, Git, Figma

EXPERIENCE

Software Developer

05/2024 – Present

Natural Resources Canada (NRCan)

Vancouver, BC

- Enhanced dashboard functionality using Government of Canada design standards and geospatial visualizations, reducing analysis time by **25%**.
- Evaluated image resolution, coordinate systems, and ML configurations across experiments, increasing volcanic deformation detection sensitivity by **20%**.
- Built a scalable ML pipeline for RCM InSAR data using **Docker** and **AWS Batch**, processing large geospatial datasets and reducing computation time by **30%**.
- Generated **10,000+** synthetic interferograms in **MATLAB** aligned with RCM specifications, improving model generalization.
- Developed a classifier combining synthetic and real radar data, reducing false positives by **15%** in stress-test scenarios.

Fullstack Developer

05/2023 – 08/2023

Provincial Health Services Authority (BC Renal)

Vancouver, BC

- Developed a **Flutter** mobile application to improve patient treatment workflows, contributing to a **30% increase** in efficiency.
- Engineered a modular architecture leveraging SOLID principles and Clean Architecture, accelerating feature iteration cycles by **15%** and reducing maintenance overhead.
- Deployed **Firebase** Realtime Database to manage user-generated content, enabling seamless cross-device synchronization and reducing data latency by **40%**, increasing user engagement.
- Produced detailed **Confluence** documentation and presented to a cross-functional team, reducing onboarding time by **20%**.

PROJECTS

Sentinel

01/2026 – Present

- Built a **privacy-first clinical summarization platform** to reduce physician documentation burden, targeting **30–50% faster note generation** and stronger patient comprehension.
- Engineered a full-stack application using **Next.js** and **FastAPI**, integrating **LLM APIs** (Gemini, Meta Llama) to generate structured clinical summaries (SOAP, consult, referral), reducing documentation time by **15%**.
- Implemented a **multi-model validation pipeline** to cross-check outputs across LLMs, reducing hallucination risk and increasing output consistency by **20–30%** in internal testing.
- Deployed scalable infrastructure using **MongoDB**, **Vercel**, and **Google Cloud Run**, achieving **sub-second response times** and enabling customizable template-based workflows that reduce clinician editing time.

Fairloft

07/2025 – Present

- Led frontend development of a responsive **React.js** platform, translating **Figma** designs into production, improving page load speed and responsiveness by **25%**.
- Collaborated with cross-functional teams (backend, design, marketing) to refine product features and user flows, contributing to improved usability and increasing user engagement metrics (e.g., session duration, interaction rates).
- Optimized UI components and interactions for responsiveness and accessibility across devices, reducing UI latency and improving cross-device performance consistency.

EDUCATION

University of Toronto

Honours Bachelor of Science in Computer Science, Minor in Statistics and Mathematics
Focuses in Artificial Intelligence, Web And Internet Technologies, Computer Vision

Toronto, ON

Expected 06/2026
